Information on product discontinuation

Dear Customers,

Herewith we would like to inform you about changes in our product range.
The articles of the **EPIC® Rectangular connector housings H-B 32** will be discontinued and are no longer available for regular order as of now.
Remaining quantities can be sold if stocks last.

As part of the ongoing development of our product portfolio, the existing H-B 32 series is being replaced by a new generation of housings. With this transition, we are consistently aligning ourselves with established market standards and creating even greater compatibility within the industrial connector landscape.

The new series offers you the following advantages:

- Improved compatibility with standard housing specifications
- Consistent appearance within the EPIC® H-B product family
- Enhanced product platform with long-term availability
- Partially optimized variant structure for simplified product selection
- Optimized standardization within the EPIC® portfolio
- Increased flexibility for future product and portfolio expansions

Link to the product list in the online shop

Please note that the previous H-B 32 series cannot be combined with the new housing series due to differing bolt sizes and bolt positions. The successor products are therefore not backward compatible.
The compatibility of the inserts remains unaffected by this change. Likewise, our SKINTOP® cable glands and other accessories from our product line can continue to be used without restriction.
Of course, the new housings continue to meet the high standards of quality, reliability, and safety that you have come to expect from our EPIC® products.

All information can also be found on our website in the product notifications section:
