You will benefit from this change, as the new items combine all the features of the above-mentioned products and offer you these additional advantages:

The majority of the new dimensions of the **UNITRONIC® RE-2Y(ST)YV S** series are characterised by

- Optimised, smaller outer diameters and therefore reduced space requirements
- Smaller bending radii

Please note that other dimensions relevant to the cable structure of the affected articles will not change, so the core and outer sheath wall thicknesses remain the same.

We will be pleased to send you further information and advise you personally. Your responsible contact person will be happy to assist you at any time.

For more information about Lapp products, please contact your Lapp account manager or visit us on <https://www.lappkabel.de/produktbenachrichtigungen/notifications.html>

We are sure to present you an attractive product range and will be happy to answer any of your questions.

Kind regards
