Date: September 25, 2025

## 1. APPLICATION

ÖLFLEX® CONTROL TM & CONTROL TM CY are an industrial grade tray cable with superior oil performance for long cable life. It has a pressure extruded jacket and fine copper stranding for excellent flexibility making it easier to pull through Tray. The shielded version with overall foil tape and tinned copper braid provides protection against EMI and RFI. UL TC-ER approval requires no conduit this provides savings on material costs and labor.

### Applications:

Plant and Factory expansions, automotive plants, tray installations, can substitute for anywhere that industrial tray cables are used. Not intended for cleanroom applications.

### Underwriters Laboratories

For Tray use in exposed run applications, Wind Turbines, Machine Tools etc. and internal or external wiring of electrical and electronic equipment.

### Canadian Standards

For Tray use, Control Instrumentation, Appliance Wiring Material and internal or external wiring of electrical and electronic equipment applications.

## 2. CABLE DESCRIPTION

- Bare copper fine wire
- PVC/Nylon insulation
- Black color coded conductors with white identification
- Green/Yellow ground wire
- Overall Foil and TC Braid Shield
- Gray (RAL 7001) UV, oil and flame resistant specially formulated thermoplastic polymer jacket
