For all customers of the EPIC® H-A 3 inserts product family

10. June 2024

Change of material for: EPIC® H-A 3 and EPIC® H-A 4 inserts

Change of design for: EPIC® H-A 3 female insert

Dear Sir or Madam

We hereby inform you about a change of material and, in connection with a new injection molding tool, a design change within the brand EPIC® H-A 3 and EPIC® H-A 4.

The material change affects the article numbers listed below.

The articles will be produced in a different polyamide (PA) in the future.

This material has a different color.

The change is being made in order to improve security of supply and ensure it for the future.

The technical and mechanical properties and the prices remain unchanged, so there is no disadvantage or restriction to the products supplied to date. The products are also VDE and UL certified with this material. The article numbers remain unchanged so that customers do not incur any expense.

During the changeover phase, which now, there may be mixed deliveries in some cases.

The new version is compatible with the previous version.

For the product EPIC® H-A 3 in bushing design, a new injection molding tool was created for the production of the plastic insulating body. This has changed in nuances in appearance. The technical parameters remain unchanged.

The new version is compatible with the previous version.

old material

new material

EPIC® H-A 3 BS, 10421000 und EPIC® H-A 3 SS, 10420000

Remaining inventory of the old product design are still in stock. As soon as these are used up, the new design will be delivered. Mixed deliveries may occur during the transition period.

Detailed information can be found in our electronic catalog at www.lappkabel.de.

Thank you for your confidence in our products.

If you have any questions, please do not hesitate to contact us.

Yours sincerely

U.I. Lapp GmbH
