

Information on product discontinuation

Dear Customers,

Herewith we would like to inform you about changes in our product range.

All article numbers of the product **SKINDICHT® SE** as well as the **multi-entries** of the product **SKINDICHT® SE-M** will be discontinued.

The items can be ordered until the remaining quantities of the basic housings are sold out.

The PG single entries of the product SKINDICHT® SE can be replaced by the **metric** single entries of the product SKINDICHT® SE-M. The housing dimensions and technical characteristics of the articles listed below are comparable. The difference is now the **metric connection thread** for the used cable glands. For every LAPP PG cable gland, you will find a metric LAPP counterpart. We are happy to advise you on this.

While discontinuing the PG variants, the product SKINDICHT® SE-M will be optimized. The housings of the remaining article numbers will be lighter, and the surface coating will be changed from hammer finish lacquered to nickel-plated. Nickel-plated surfaces are standard at LAPP, and it promises better corrosion protection as well as a modern design.

The hammerstone variant will be delivered until the available stock of the basic housings is sold out. Afterwards, the article numbers will be switched to the nickel-plated variant.
