To all customer of the EPIC® H-A 3 product family

24.04.2024

Product design adjustment EPIC® H-A 3 housings
Product discontinuation PG threat for EPIC® H-A 3 housings

Dear customers,
Dear business partners,

We would like to inform you about changes in our product range.

The EPIC® H-A 3 AG, TG and TGB range of enclosures has been revised. These are the panel mount base housing (AG), the hood housing (TG) with straight cable outlet and the coupler housing (TGB). The new housings can be combined with the previous ones and all previously used connector inserts can also be used in the new generation of housings. There will no longer be PG threads in the new generation.

These are the main changes:

- A plastic bracket is used instead of a metal bracket.
Ergonomically shaped, easy to operate, suitable for over 500 mating cycles
- Marking arrow for correct insertion even in hard-to-see places
- Metric connection thread, the previous PG variants are no longer available
- New manufacturing process enables attractive prices

EPIC® H-A 3 AG

EPIC® H-A 3 TG

EPIC® H-A 3 TGB

The discontinued PG variants are still available in remaining stock.
As soon as the stock has been used up, the metric versions will be supplied.

Remaining stocks of the old product design are still in stock. As soon as these are used up, the new design will be delivered. Mixed deliveries may occur during the transition period.

You can find the detailed data in our electronic catalog at www.lappkabel.de.

We will be happy to send you further information and advise you personally.
Your contact person will be happy to help you at any time.

Yours sincerely
