

Thinking innovatively, acting sustainably

At LAPP sustainability is an integral part of our corporate strategy and culture. For us, economic success is always linked to social and ecological commitment. We are working on various sustainability activities and objectives.

Sustainability as part of our global strategy

Minimum 50 % reduction of our Corporate Carbon Footprint by 2027 (Base year: 2022, Scope 1 & 2)

PCF calculations for all relevant products

Generating green electricity at various LAPP locations globally

Purchase of 100% green electricity at all LAPP locations globally by 2027

Use of biobased and recycled materials

Certified ISO 14001 (Environmental Management) and ISO 50001 (Energy Management) systems

Partner of The Copper Mark, an assurance framework for copper

EcoVadis rating for the entire LAPP Group

Diversity, Equity and Inclusion (DEI) anchored into the global strategy

All LAPP entities globally are performing at least once social project yearly

5% of all LAPP employees globally are trained as mental health aiders
