

LAPP INTRODUCED A NEW GENERATION OF CORDSETS

LAPP is expanding our in-house manufacturing capabilities and proudly presents a significantly extended cord-set portfolio -- now more than double the previous range.

Broader range

- M5, M8, M12 up to M16 for Data, Power, and Signal
- PVC, PUR, & TPE jacketing
- Straight and angled connector versions
- A wide selection of connector coding types, including A, B, C, D, X, K, L, S, T and Y
- Field wireable connectors available for most coding types.

Enhanced design

- Up to IP69K protection (M8, M12)
- A robust construction ideal for harsh environments
- Color-coded housings for easy identification available upon request
- Single & double ended cables, mix coding types available.

Strategic industries

- Food & Beverage
 - Automotive
 - Logistics, Material Handling
 - Manufacturing
- Including enhanced resistance to temperature, chemicals, vibration, and seawater, depending on the application.

Certified for global use

The new cordsets are CE marked, and the most widely used versions are also UL approved -- supporting seamless export and use in the US market.
